

Personal Decision Intelligence Dashboard

Analyzing how daily habits impact productivity

Built by MSc Computer Science student focusing on Data Science and AI ↔

This dashboard analyzes how your habits affect productivity.

Your Data

	date	sleep_hours	study_hours	screen_time
0	2026-04-20 00:00:00	6	3	
1	2026-04-21 00:00:00	7.5	5	
2	2026-04-22 00:00:00	5	2	
3	2026-04-23 00:00:00	8	6	
4	2026-04-24 00:00:00	6.5	4	
5	2026-04-25 00:00:00	7	5	
6	2026-04-26 00:00:00	4.5	1	
7	2026-04-27 00:00:00	8.2	6	
8	2026-04-28 00:00:00	6	3	
9	2026-04-29 00:00:00	7.8	5.5	

Avg Sleep

6.65

Avg Productivity

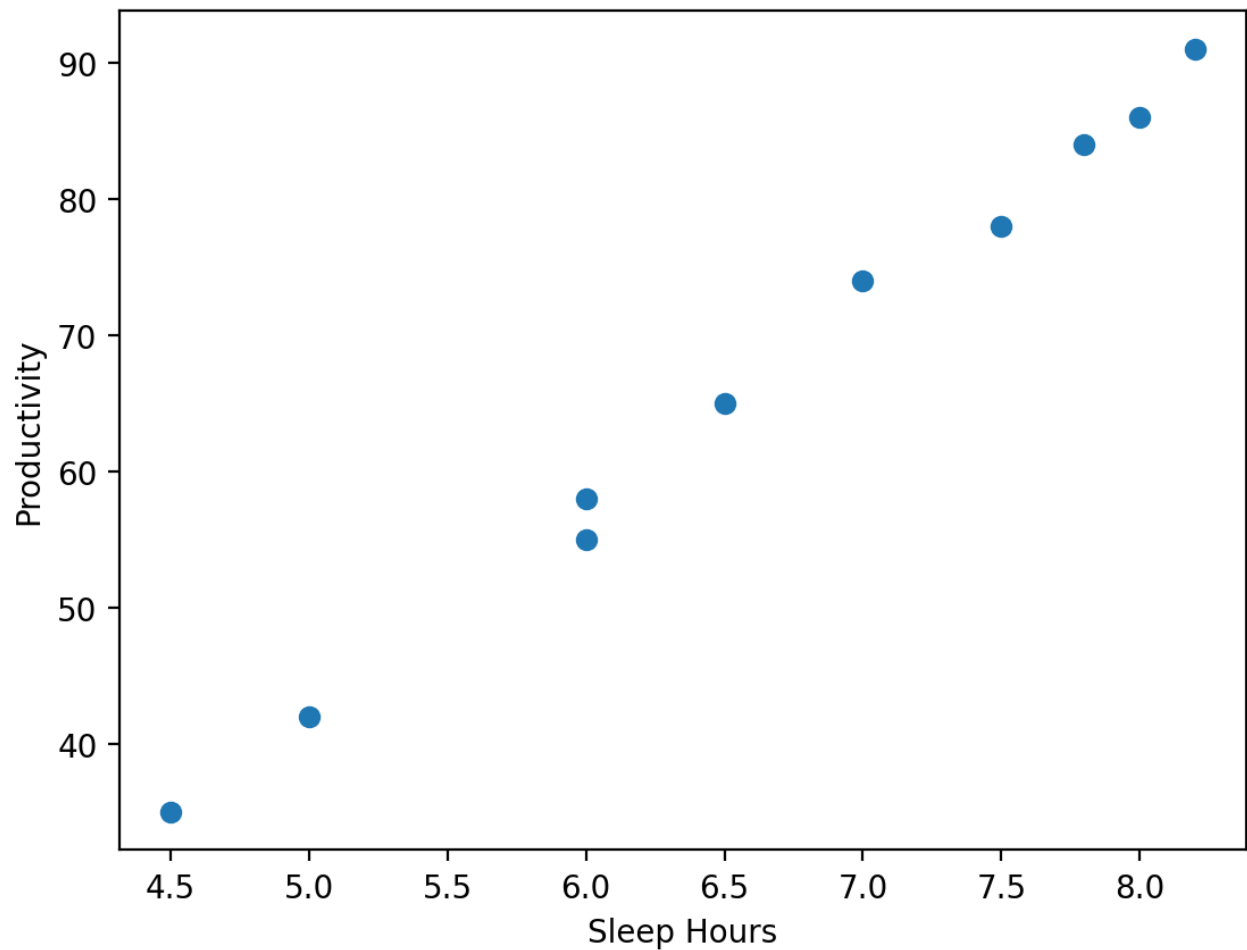

66.8

Productivity Over Time

Sleep vs Productivity

Insights

Avg productivity (≥ 7 h sleep): 82.6

Avg productivity (< 7 h sleep): 51.0

Insight: Higher productivity is associated with sleeping 7 hours or more.

Conclusion

This project demonstrates how personal data can be analyzed to generate meaningful insights and support better decision-making.
